[Editorial Correspondence of the Yeoman.] No. 104, Owen's Hotel.

Louisville, October 10., [ DEAR YEOMAN:—I have just returned gard to the steamer Arctic, which vessel Jerry Rescue Celebration,' in Syracuse, from the Fair Grounds, and somewhat re- has, for several days, in consequence of New York, on the Soth ult. It is unnec-moved from the noise and bustle which its non-arrival, caused great anxiety as to essary for us to say, that the people of the has confused me all this morning, I am its fate. The dispatch states that the I, LAZARUS W. POWELL. Governor of South and all right-thinking men of the quietly awaiting the answer to a card, Arctic was run into and sunk by a prowhich I have just sent to my "fair ladye peller. About three hundred lives were THURSHLY, THE 30th DIV OF NOVEMBER, 1851; with first such sentiments as at ove." While doing nothing, I concluse lost; only about thirty were saved, very prople of Kentucky, on that day, suspend their horrence. If these two individuals, and the few of whom were passengers. Further ordienty poisuns, in order that all may attend on many others of similar character, had utassemblages for prayer, thanksgiving and proise of Similar enal acter, lind uttered such sentiments in the days of the treesing, say my mind was engrossed with to press; if so, we will give them.

The has bestowed upon us as a people, a State, and revolution, they would have been branded with one of Lovi villar friends as a people.

this map is that also to the serve that in some Water. a present has evanous Volate's assessance in the density that the cenaled survey Asias white)

discover other intermediate beds of one of which may be workable, and the south these beds of coal father 

glomerate, and continues, therefore, the deepest seated coal beds of the S in a Western Kentacky coal field—beds which run many handred feet under the level of the Ohio river at Handerson. At this share of the sarrey it wind be prematured to promining with continues at the design at the sarrey it wind be prematured to promining with continues as to the precise nearly of the best of Winght's a tion and those stream of the best of winght's strong the results of the finding the county, but its probably that at least four of the best of coal passed through in botting, he cattredy above the lugiest of the Wright's section series. Hence, in the variously of the Ohio river in Henderson county, both the upper and lower series can be gained by drifts and shafts. Muhlenburg and Hapkins counties offer the best opportunities, therefore, of reaching the lower beds of the coal basin by adit levels above the general drainage; but Henderson county possesses the greatest number of beds accessible chiefly by shafts.

It is to be borner in min I, however, that the finance of the possession while the Martin coal, 3 times weets of North.

of such facts or laws as these, together with the estimation, from time elements of dip, and variation of thickness of the interposed strata at distant sections, of the depth of which any might say by its marthe roof—since this dimeat distant sections, of the depth of which any be reached by a shaft or discovat distant sections, of the depth of which any given bed may be reached by a shart or discovered in a hill side, are some of the important results which are amend at in carrying out the detailed survey. All correct r cords of borings or diggings made either in search of coal, water, brine, or other materials are always so much of survey and for the detailed survey. All correct r cords of borings or diggings made either in search of coal, water, brine, or other materials are always so made for the detailed survey. The detailed survey is the detailed survey and the detailed survey and the detailed survey in the detailed survey. The greatest produce of the Black Band ore with the coid blast never exceeded sixty tons a week; now, with the kot binst, it amounts to limit to the feet to inches thick: information towards this desirable knowledge. I. therefore, take this opportunity of requesting all citizens of Kentucky undertaking such works to be very precise in noting the thickness of different beds passed through; such as sandstone, argulaceous shale, black bituminous shale, coal, the same quantity of shart will produce a larger the same quantity of blast will produce a larger pure to find a sandstone, the same quantity of blast will produce a larger pure per ton."

100.00 capatity of tree works argulated, by Musnet, to the use of the hot air blast. And he adds: "With raw pit coal less blast is required to produce and three peace per ton; and, on the roasted the same quantity of inother words or, in other words or, in other words or, the same quantity of blast will produce a larger peace per ton." and in preserving these records for the benefit of the geological survey in which every citizen of the State is deeply interested, and which, if prosecuted in detail according to the plan which I have in view, and with sufficient force and means, must prove of enduring benefit to and means, must prove of enduring benefit to every enterprise which may be undertaken, as the Eave's coal, a mile or two North of Green dueed in a given time." The ratio of increase well as to the citizens at large; even if they as the Eave's coal, a mile or two North of Green dueed in a given time." The ratio of increases

should not be the owners of what, in the com

bhafts.

It is to be borne in mind, however, that the same bed does not always preserve a difform thickness over exten a larges; on the contrary, it will probably be frequently found to be the case that beds which are thick lowerly the South and West, will thin in a North and East direction and vice versa. The determination of such facts or laws as those, together with the estimation, from the elements of dim, and

10d 0 Lace non end, E. and, analysed by Johnston. partially would for the are of the Buckner fur-
